

NLP Tools for Real Life

Neuro linguistic programming (NLP for short) is all about bringing your unconscious thoughts to the surface, so that you can have real choice over how you interact with and respond to the world. Once you have a grasp on NLP's basic principles, you might be interested in learning about some tools that can help you do more with NLP. This training will give you some hands-on experience with important NLP techniques, including anchoring, establishing congruency, developing rapport, creating outcomes, interpreting and presenting information efficiently, and even some self-hypnosis techniques.

To get the most out of this workshop, participants should first complete *An Introduction to Neuro Linguistic Programming*.
